Potassium (as potassium bicarbonate)	600 mg	17%
Symbiotropin® blend	3.7 g	
L-Glutamine		†
L-Arginine-L-Pyroglutamate		†
L-Lysine Hydrochloride		†
Glycine		†
AlphaSize® Alpha-Glyceryl Phosphoryl Choline (A-GPC)		†
Gamma-Aminobutyric Acid (GABA)		†

* Percent Daily Values are based on a 2000-calorie diet
† Daily Value not established.

Other ingredients: Citric acid, natural and artificial flavor, magnesium oxide, stevia extract.

AlphaSize® is a registered trademark of Chemi Nutra.

Directions

Dissolve two Symbiotropin sachets in four to six ounces of water. Once fully dissolved, stir and drink immediately. It is best to take Symbiotropin at bedtime, two to three hours after last meal. Take for five days and skip two days. Repeat cycle.

Alternative protocol

To maximize the effects of your exercise regimen,* take one sachet of Symbiotropin in the morning 30 minutes before breakfast, in addition to two sachets at bedtime, two to three hours after last meal. Take for five days and skip two days. Repeat cycle.

SYMBIOTROPIN

SYMBIOTROPIN®

NEURO * IMMUNE * ENDOCRINE *
AMINO ACID SUPPLEMENT

SYMBIOTROPIN®

THE LONGEVITY OF SYMBIOTROPIN

Launched in 1996 for physician recommendation, Symbiotropin was the first of its kind. Designed to help support the body's natural hormone production, physicians began to incorporate it into their prescribing patterns and nutritional protocols.* The word spread quickly among serious athletes and bodybuilders who used it to gain that extra edge. The rest is history.

From the doctor's office to the playing field, Symbiotropin is recommended and used by doctors, athletes and dedicated men and women striving for peak performance and exceptional well-being. Now we have improved it again with the addition of AlphaSize® A-GPC, the premier choline donor. AlphaSize® A-GPC fuels neurotransmitter formation which is vital for peak mental and physical performance.

FUEL FOR YOUR BODY'S NATURAL HORMONE PRODUCTION*

Symbiotropin was formulated to support your body's natural production of growth hormone.* Growth hormone is naturally released by the pituitary gland in response to sleep and exercise in order to help replenish tissues. Symbiotropin does not contain growth hormone, rather it contains a specific ratio of amino acids and the clinically studied AlphaSize® A-GPC.

From building **LEAN MUSCLE** to keeping your immune system **STRONG**, give your body what it needs with amino acids.

HIGH-OCTANE **AMINO ACIDS** TO SUPPORT NEURO, IMMUNE AND ENDOCRINE HEALTH*

To make sure your body has the energy it needs to stay healthy and strong, you need to fuel it with the power of amino acids. As the basic building blocks of proteins, amino acids are both synthesized within the body and acquired through diet. In the body, amino acids:

- provide a source of fuel
- assist in neurotransmitter formation
- facilitate hormone and immune function

THE **ATHLETE** AND SYMBIOTROPIN

Fitness enthusiasts choose to incorporate Symbiotropin into their nutrition and training regimen to:

- fuel athletic performance*
- support the growth and repair of lean muscle*
- strengthen immune function to maximize exercise recovery*
